DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-8, drawn to universal polypeptidic carrier.

Group II, claims 9-18, drawn to polynucleotide.

Group III, claims 19-22, drawn to methods for delivering a sequence or expression vector.

Group IV, claims 223 and 24, drawn to a pharmaceutical composition.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature of Group I, the universal polypeptidic carrier comprising the Shiga Toxin B, amino acid or polypeptide and cysteine is not special in view of the carrier disclosed in Haicheur et al (J. Immunology, 2000, 265:3301-3308). The technical feature of Group I is not special in that it does not define a novel contribution over the prior art; as such there is not a special technical feature and therefore the Groups of inventions, I-IV, lack a corresponding special technical feature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
